

Machine Screws With Locking Patch and Threaded Inserts - The Complete Solution

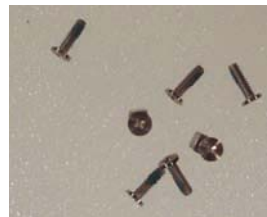

- Head type:** Wafer, thin head, Pan and many others
- Drive type:** Many high performance recess technologies available.
- Material:** Low carbon steel and stainless steel
- Coating type:** RoHS plating finishes and passivation
- Thread type:** Machine
- Size:** Various sizes 0.6mm to 5mm

Micro Fasteners & Mechanical Components

Consumer, business and mobile device products become smaller. you need an electronics fastener supplier who can meet these demands. Infastech offers a broad range of fasteners in sizes as small as M0.6 (#000) with head styles and drive recess technologies to meet your performance requirements. A micro range of Inserts, Contact pins, standoffs, clinch nuts and other components are also available.

Material: Brass, Stainless Steel or low carbon steel

Captive Screws – SEMS

SEMS screws with captivated general or locking washers help resist loosening and distribute the torque load over a larger surface area of the top material. Ask our engineering team for testing on your application to ensure optimal performance.

- Materials:** Low carbon Steel, stainless steel
- Sizes:** M1.2 to M8
